## ENGINEERING EXCEPTION TEXT (CONTINUED )

STD specified on the drawings for the HANDLES.

### 6. QAP (QS) 11579010 - Change STM-1 FIRST ARTICLE REQUIREMENTS:

From:

Two each TUBE ASSEMBLY, TRAVERSING, 11579010, shall be furnished for 100 % inspection to assure compliance with QAP(s), specification(s), drawing(s), and contract. One unit shall be furnished unassembled and without protective finish per Dwg 7309999 applied to applicable parts. The other unit shall be furnished assembled and with protective finishes applied in accordance with applicable drawings. Documentation of the phosphate coating process (ref para 3.1 & 4.5 of DOD-STD-16232) shall be submitted with the First Article.

To:

One each TUBE ASSEMBLY, TRAVERSING, 11579010, shall be furnished for 100 % inspection to assure compliance with QAP(s), specification(s), drawing(s), and contract.

"The following Government Acceptance Inspection Equipment (AIE) designs drawings, cited elsewhere in the technical data, are appropriate for use during performance of this contract to inspect the applicable characteristics

- o All AIE designs specified for critical Characteristics/ Defects

- o Other -Lists by citing individual drawing numbers or equipment List(s).

NONE

All other Government AIE designs which are cited in the Technical Data Package List or in any of the documents in the technical data package are no longer being maintained by the Government, may not reflect the latest component configuration and are, therefore, included for information purposes only. Except for the AIE designs listed above, the contractor is responsible for the design and submission to the Government for review of all other AIE in accordance with Clause \_\_\_\_\_ specified elsewhere in Section E of this contract."
